

DUNDU — APP LAUNCH PLAN

Stage-wise plan — Software → Purchase → Delivery & Return

Prepared 2026-09-04 — grounded in the current codebase (spec.md / detail.md) plus business decisions still open

Dundu Launch Plan — Item Count by Status (all stages)

Built 51 items	Partial 10 items	To Decide 23 items	Not Started 20 items	Needs Fix 2 items
--------------------------	----------------------------	------------------------------	--------------------------------	-----------------------------

STAGE 1 — SOFTWARE

1.1 Platforms Overview

Platform	Technology	Audience	Status	Notes
Admin Panel (admin/)	React.js + Tailwind CSS, Vite :3001	Super Admin & Branch Admin	Built	Manages the entire online store
Web Storefront (web/)	React.js, Vite :3000	Customers (browser)	Built	Public storefront + account area
Mobile App (mobile/)	React Native, Expo SDK 54	Customers + Delivery Staff	Built	Two nav worlds: shopping app vs delivery-staff app, from one login
Backend API (backend/)	Node.js + Express, :5000	Shared by admin/web/mobile	Built	PostgreSQL DB; REST API under /api
Offline System (dundu-offline/)	React + Node, planned :5001	In-store branch staff	Not Started	Folder does not exist yet — separate DB (dundu_offline), no shared code with online system

1.2 Admin Panel — Dashboard & Analytics

Feature	What It Covers	Status	Notes
Dashboard	Total sales, total orders, total users, revenue graph, recent orders	Built	
Inventory Dashboard	Stock levels across products/variants	Built	
Product Insights	Overview / Categories / Product Demand / Variants tabs	Built	
Sales Report	Daily sales report (branch billing)	Built	
Finance Report	Revenue/finance rollups	Built	
User Activity	Login logs + product view logs per user	Built	
User Insights	Aggregated customer behaviour stats	Built	
Birthday Ticker	Upcoming customer birthdays, shown in TopBar	Built	

1.2 Admin Panel — Catalog Management

Feature	What It Covers	Status	Notes
Products	Add/Edit/Delete/Hide, Mark Featured, Mark Offer Product. Fields: category, name, brand, description, material, type, gender, age group, size, color, price, offer price, stock, SKU, product code, images, variants (size/color/stock/SKU)	Built	
Categories	Women, Kids, Newborn, Maternity	Built	
Combos	Bundle builder: combo price/offer price/stock + selectable product slots	Built	No web UI yet — admin + mobile only
Brands	Brand list management	Built	
Product Materials	Material list management	Built	
Reviews	Approve/manage customer reviews, or create admin-authored reviews	Built	
New Arrivals	Flag/curate new-arrival products	Built	

1.2 Admin Panel — Orders & Fulfilment

Feature	What It Covers	Status	Notes
Order List / Detail	Full order record, line items, customer, address	Built	
Order Status Update	Pending → Packed → Shipped → Delivered	Built	
Invoice Download	PDF invoice per delivered order	Built	
Returns	Approve / Reject return requests	Built	Permission-gated ('returns') for branch admins
Cart Monitor	View active carts + abandoned-cart tracking	Built	
Wishlists	View customer wishlists	Built	

1.2 Admin Panel — Marketing & Engagement

Feature	What It Covers	Status	Notes
Announcements	Top-bar marquee text, colors, active toggle	Built	
Banners	Home banner slider + badge text/color	Built	

Feature	What It Covers	Status	Notes
Coupons	Coupon codes applied at checkout	Built	
Loyalty Cards	Points + total spend, keyed by phone number	Built	
Referral System	Referral code per user, reward on successful referral	Built	
WhatsApp Broadcast	Bulk WhatsApp message to customer list	Built	Needs live WhatsApp API creds
Spin Wheel	Weighted prize segments, per-user targeting (new/existing/VIP), time-slot windows, per-user enable toggle, forced popup, redemption log	Built	Web: passive only (auto-applies a won reward)
Scratch Card	Prize pool, min-order eligibility, cooldown, date window, forced popup	Built	No web UI
Festival Theme	Seasonal name/emoji/colors/banner + optional popup with coupon	Built	No web UI
First Purchase Offer	Flat discount or order-value slabs, auto-apply or coupon	Built	No dedicated web/mobile UI found — verify before relying on it
Birthday Campaign	7-day-ahead lookup, WhatsApp send, configurable discount %	Built	
Free Shipping Nudge	Threshold-based nudge (■500 seen in mobile)	Partial	Mobile only — check web gap

1.2 Admin Panel — Users, Staff & Settings

Feature	What It Covers	Status	Notes
User List / Detail	Browse customers, block user, order history, addresses	Built	
Admins	Add admin, assign role & permissions, branch access	Built	Permission set: billing, orders, returns, loyalty, reports
Delivery Staff	Manage delivery-staff accounts	Built	
General Settings	Store-wide configuration	Built	
Payment Methods	Configure accepted payment methods	Built	Backend gateway code covers Razorpay only
Delivery Settings	Delivery rules configuration	Built	Confirm shipping-fee rule engine is complete
Return Settings	Return-policy configuration	Built	Actual policy values still a business decision

Feature	What It Covers	Status	Notes
Splash Screen	Mobile app splash screen config	Built	
App Update Notice	Force/soft update messaging for mobile app	Built	

1.3 Business Identity Setup (do before go-live)

Requirement	What's Needed	Purpose	Status	Notes
Business Bank Account	Current account in Dundu's registered business name	Receive gateway settlements (Razorpay/Cashfree/PhonePe) + COD reconciliation	To Decide	
Business PAN / GST	Registered as required for the business entity	Required to open current account + gateway KYC	To Decide	
Dundu Business Phone Number	A dedicated number, not a personal one	Customer support line shown in app/web footer & invoices	To Decide	
WhatsApp Business Number	Same or separate number, registered on WhatsApp Business Platform (Meta) or via Twilio WhatsApp API	Order status messages, OTP, marketing broadcast, cart-reminder nudges (spec §4)	To Decide	Backend service (services/whatsapp) exists; needs live API credentials
Business Email	e.g. support@dundu.com / orders@dundu.com	Support inbox, password-reset emails, invoices, Play Store/App Store developer contact	To Decide	
Domain Name	e.g. dunduonline.com	Web hosting, business email, brand presence	To Decide	
User Phone Verification (OTP)	WhatsApp/SMS OTP at signup & login	Confirms a real registered user before checkout	Needs Fix	otp.service.js queries columns (target/purpose) that don't exist in the otps table — verify/fix before go-live
User Email Verification	Not currently built	Optional extra verification / recovery channel	Not Started	Decide if needed before launch

1.4 Deployment — Web, Backend, Play Store, App Store

Item	What's Involved	Status	Notes
Backend Hosting	Cloud VM/container host (Railway, Render, DigitalOcean, AWS, etc.) + PostgreSQL DB provisioning	To Decide	docker-compose.yml already containerizes backend+db

Item	What's Involved	Status	Notes
Web + Admin Hosting	Domain + SSL + nginx serving web(:3000) & admin(:3001), proxying /api & /uploads to backend	To Decide	Covered by root docker-compose.yml
Production Environment Secrets	Real values for JWT secret, Razorpay keys, Twilio creds, Cloudinary, Google OAuth	To Decide	Full list in backend/.env.example
Database Migration on Deploy	Run node-pg-migrate on first boot & after every new migration	To Decide	docker compose exec backend npm run migrate — not automatic
Payment Gateway — Live Keys	Razorpay live mode credentials + business KYC	Partial	Cashfree / PhonePe named in spec but not coded yet
Android Build	Expo EAS Build → .aab	Not Started	mobile/ is Expo SDK 54, EAS-ready
Google Play Store Listing	Developer account (~\$25 one-time), store listing, screenshots, privacy policy, content rating, internal test → production rollout	Not Started	
iOS Build	Expo EAS Build → .ipa	Not Started	
Apple App Store Listing	Apple Developer account (~\$99/yr), App Store Connect listing, screenshots, privacy nutrition label, App Review	Not Started	
Mobile Config for Production	Point EXPO_PUBLIC_API_URL at the live backend domain	Not Started	Currently falls back to a hardcoded dev LAN IP if unset
Offline System Build + Deploy	dundu-offline/ super-admin + branch-admin + backend-offline, separate deploy on :5001	Not Started	Code doesn't exist yet — fully separate project

STAGE 2 — PURCHASE (SOURCING)

2.1 Sourcing by Category

Category	Where to Purchase (fill in)	Why Here (fill in reasoning)	Status	Notes
Women	— to decide —	— cost / quality / MOQ / proximity —	To Decide	App category: Women
Kids	— to decide —	— cost / quality / MOQ / proximity —	To Decide	App category: Kids
Newborn	— to decide —	— cost / quality / MOQ / proximity —	To Decide	App category: Newborn — needs safety-certified fabric (non-toxic dye, soft-cotton GSM)
Maternity	— to decide —	— cost / quality / MOQ / proximity —	To Decide	App category: Maternity — comfort/fabric-specialist supplier

2.2 Supplier Decision Checklist (answer per supplier)

Criteria	Question to Answer	Status	Notes
Cost	Per-unit cost vs target retail price & margin	To Decide	
Quality	Sample check — fabric GSM, stitching, print quality	To Decide	
MOQ	Minimum order quantity the supplier requires	To Decide	
Location	Local vs outstation — freight cost & lead time	To Decide	
Reliability	Delivery consistency, past buyer reviews/references	To Decide	
Payment Terms	Advance % required, credit period offered	To Decide	
Supplier Return Policy	Terms for returning defective/wrong goods to the supplier	To Decide	
Certification (Newborn)	Safety standard / non-toxic dye certification	To Decide	

STAGE 3 — DELIVERY & RETURN

3.1 Delivery

Component	Condition / Detail	Status	Notes
In-house Delivery Flow	Delivery-staff role in mobile app: Home → Scan pickup QR → Complete delivery	Built	delivery_qr_token, picked_up_by/at, delivered_by/completed_at all tracked
3rd-Party Courier Fields	courier_name / courier_tracking_number / courier_phone stored on order	Built	Manual entry only — no live courier API integration
Order Status Notifications	WhatsApp message on Packed/Shipped/Delivered	Built	Needs live WhatsApp API credentials to actually send
Delivery Zones / Serviceable Areas	Define which pin codes / cities are serviceable	Not Started	Business decision
Delivery Charges Rule	Flat fee, distance-based, or free-above-threshold	Partial	■500 free-shipping nudge exists in mobile; confirm full rule in Admin > Delivery Settings
Delivery Timeline / SLA	Target duration for each status step, communicated to customer	Not Started	Business decision

3.2 Returns

Component	Condition / Rule	Status	Notes
Return Window	e.g. "7 days from delivery" — exact number still to decide	To Decide	return_status + return_requested states already exist in schema
Return Request Flow	Customer requests a return from Order Detail (web & mobile)	Built	
Return Approval	Admin approves/rejects under Admin > Returns	Built	Permission-gated ('returns')
Refund Method	Original payment method vs wallet credit vs bank transfer	Not Started	Business decision — no wallet system built yet
Exchange vs Refund-Only	Whether size/color exchange is offered, or refund only	Not Started	Business decision
Return Shipping Cost	Who bears the return freight — customer or Dundu	Not Started	Business decision
COD Order Refunds	Refund route for orders with no original online payment	Not Started	Business decision — likely bank transfer/UPI payout

FEATURE STATUS MATRIX

Cross-platform feature coverage

Feature	Admin	Web	Mobile	Backend	Status	Notes
Spin Wheel	Full config	Passive (auto-applies win)	Full UI	Full (7 migrations)	Partial	Web experience gap
Scratch Card	Full config	None	Full UI	Full (self-migrated tables)	Partial	Web experience gap
Festival Theme	Config page	None	Full theming + popup	Settings-table only	Partial	Web experience gap
First Purchase Offer	Config page	Not found	Not explicit	Settings-table only	Partial	Needs a real consuming UI
Birthday Campaign	Full	Full popup	Full popup	Full	Built	
Free Shipping Nudge	Check Settings	Not found	Full	Threshold-based	Partial	Web experience gap
Combos (Bundles)	Full CRUD	Not found	Full screens	Full (cart + tables)	Partial	Web experience gap
Offline / Branch System	N/A	N/A	N/A	N/A	Not Started	Planned only — code doesn't exist
Payment Gateway	Razorpay only	Razorpay only	Razorpay only	Razorpay only	Partial	Cashfree/PhonePe named in spec, not implemented
OTP Service	—	—	—	Column mismatch bug	Needs Fix	Verify before relying on OTP login
Wallet	—	—	—	—	Not Started	Recommended future feature (spec §6)
Multi-language Support	—	—	—	—	Not Started	Recommended future feature (spec §6)
Live Delivery Tracking	—	—	—	—	Not Started	Recommended future feature (spec §6)
AI Product Suggestions	—	—	—	—	Not Started	Recommended future feature (spec §6)
Vendor Panel	—	—	—	—	Not Started	Recommended future feature (spec §6)
